CLOTHING PROTECTORS

DISPOSABLE UNDERARM PADS FOR THE PROTECTION OF CLOTHING

There are three types of pad available, a full pad in black or white which is suitable for sleeved tops and a white pad for sleeveless tops. The pads are made from absorbent cotton gauze, with a sweat resistant backing for use with clothing.

Sleeved clothes: black & white

Take the full pad and remove the backing paper from the larger of the two halves. This half will go inside the shirt next to the chest.

Place the pad on the item of clothing. With the smaller half uppermost ready to fold over.

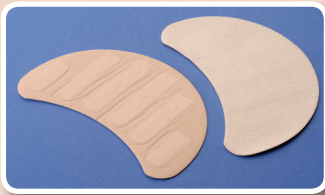

Remove the backing paper from the smaller half and fold into the arm sleeve.

Check there are no wrinkles. The pad should now be in place and ready to use.

Sleeveless clothes: white only

This pad isn't folded and sticks to the clothing on the inside with the pad next to the skin. Simply peel off the backing paper and stick the pad inside the item of clothing.

*Please note the pads may slip if levels of sweating are very high.
